

CARE AND MAINTENANCE

ROUTINE CLEANING

Hand cleaning of the coated surface, to visibly remove accumulated dust or fingerprints, can be accomplished using a number of different cleaning products.

RECOMMENDED ROUTINE CLEANING PRODUCTS

- Multi-Surface Cleaner (colourless liquid)
- A mixture of one part vinegar with ten parts water. The use of ammonia-based and alcohol-based cleaners is not recommended as these products tend to leave visible streaks.

ROUTINE CLEANING PROCEDURE

- It is recommended that jewellery and watches be removed prior to cleaning and that gloves be worn.
- Flood the surface with the spray-on cleaning solution or with a cloth saturated with the cleaning solution. Be generous with the amount of solution applied.
- Rub the wet surface with a clean, lint-free towel or cloth.
- Wipe dry with a dry, clean, lint-free towel or cloth. Do not use a squeegee on the surface.

SPOT CLEANING

- Occasionally spot cleaning may be required to remove stubborn dirt or foreign materials which adhere to the surface, such as grease or oil. Do not use razor blades, steel wool, scouring bristles or other metallic or abrasive objects on the coated surface as this will permanently scratch the product and could void the warranty.

RECOMMENDED SPOT CLEANING PRODUCTS

Acetone (solvent available from hardware stores) must be used strictly in accordance with the manufacturer's recommendations and warnings.

SPOT CLEANING PROCEDURE

- Apply a small quantity of the cleaner listed above to a clean, wet cloth or towel.
- Rub on areas needing spot cleaning.
- Wipe clean using a dry, clean, lint-free towel or cloth followed by a routine cleaning procedure.

ABOUT THIS CLEANING, CARE AND MAINTENANCE ADVICE

This information is offered as a general guide only. This guidance does not preclude the use of other methods, materials or equipment; however the user should undertake careful evaluation and make suitable enquiries as to the suitability of alternative methods, materials or equipment, before using them.
